This statistical report presents tables showing current and historical data on U.S. foreign trade in agricultural products. Commodity and country information is for the most recent 2-year period. Statistics for fiscal year 1990 are preliminary.

U.S. foreign agricultural trade statistics in this report were derived from official data released by the Bureau of the Census. Agricultural commodities are defined as (1) nonmarine food products and (2) other products of agriculture, including fibers, raw hides and skins, fats and oils, and beer and wine, which have not passed through complex processes of manufacture. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in-transit through the United States from one foreign country to another when documented as such by the U.S. Customs Service.

Trade statistics for selected nonagricultural products, including fertilizer, fish, agricultural chemicals, farm machinery, and manufactured tobacco, are presented at the end of the commodity group tables.

Effective January 1, 1989, the United States joined other countries in adopting a new export and import commodity classification system based on the international Harmonized Commodity Description and Coding System (HS). The HS is intended to serve as a universal product nomenclature superseding the Customs Cooperation Council and the Brussels Tariff Nomenclatures previously used by many other countries. A discontinuous series produced by the change to HS requires data users to link the October-December 1988 statistics with those indicated in the January-September 1989 tables. Data reported in the commodity group by country tables have been assigned to existing ERS commodity groups to the extent possible. Many HS commodities are now reported in more detailed form than under the old Schedule B system, while others have been combined into broader groups.

### Exports

Export data include "exports of domestic merchandise," defined as commodities grown, produced, or manufactured in the United States, and commodities of foreign origin that have been changed from the form in which they were imported. The export value is generally equivalent to a free-alongside-ship (f.a.s.) value at the U.S. port of export, based on the transaction price and including inland transportation, insurance, and other costs. Agricultural exports have been adjusted for transshipments through Canada based on information provided by the Federal Grain Inspection Service. More than 3,000 revisions have been incorporated into the 1989 and 1990 tables based on Census Bureau errata.

### Imports

Import data are "imports for consumption," which include entries for immediate consumption and withdrawals from bonded Customs warehouses. The import value is defined as the "Customs value," based on the foreign market value, export value, or constructed value, and excludes import duties, freight, insurance, and other charges incurred in moving the commodity to the U.S. port.

## A USDA/ERS BRIEFING BOOKLET

### THE 1990 FARM ACT AND THE 1990 BUDGET RECONCILIATION ACT

#### How U.S. Farm Policy Mechanisms Will Work Under New Legislation

This new 40-page booklet, explaining new farm legislation, has just been released by the Economic Research Service of the U.S. Department of Agriculture. This booklet explains the main features of the new 5-year farm law in easy-to-follow pages of illustrative material. These "verbal graphics" act as a self-programmed instruction method, as the reader easily proceeds from one point to another. The booklet works in the same general way as an informal briefing which makes its points step-by-step with overhead transparencies.

The booklet begins with an overview of the goals which motivated changes in farm legislation, accompanied by the most important mechanisms that support them.

#### Main goals

Reduce the Federal deficit

#### Basic Mechanisms

Reduce payment acres

Improve agricultural competitiveness

Permit planting flexibility;  
Maintain market-oriented loan rates

Enhance the environment

Implement Agricultural Resources  
Conservation Program

The booklet then proceeds with definitions and illustrations of basic mechanisms of farm policy for the next 5 years:
